

# Speech-Language Pathologist Summary of Rental Outcomes

**Evaluating Speech-Language Pathologist**

Susan Pathologist

**Email Address of Evaluating Speech-Language Pathologist**

fundingservices@ablenetinc.com

## Demographic Information

**Patient's Name**

John Smith

**Patient's Date of Birth**

03/01/2019

## Background Information

**Medical history with summary of speech therapy intervention**

John's mother reported he was a full-term baby born without complications. John walked alone at 15 months, used single words to communicate at approximately one year of age. He used an expressive vocabulary of >10 words and participated in joint attention routines such as pat-a-cake and peek-a-boo. At 18 months, John began to withdraw and no longer made eye contact or responded when spoken to. His expressive vocabulary shrank to two words (no and water, which he used only infrequently). He was diagnosed with Autism in August 2020. John has received speech therapy (ST) consistently since his diagnosis and has demonstrated significant progress toward the development of functional communication skills. He is now able to use alternative/augmentative communication to request preferred items/activities, makes consistent eye contact during shared routines, and in vocal play.

**Speech & Language ICD 10 Code & Description (Select all that apply)**

F80.2 - Mixed Receptive-Expressive Language Disorder, F84.0 - Autistic Disorder

## Device Rented

**Communication App**

Proloquo2Go

**Rental Start Date**

04/03/2023

**Rental End Date**

07/03/2023

## Device Rented

### Rental outcomes of the 90-day rental period and prognosis with the QuickTalker Freestyle

John has been trialing a QuickTalker Freestyle SGD since 4/3/2023. He has demonstrated the ability to independently communicate his wants and needs. When communication partners could not understand John verbally, he used his SGD to effectively communicate. This has significantly decreased his tendency to physically manipulate these partners and decrease behaviors associated with not being able to communicate effectively. John would greatly benefit from having his own dedicated SGD as the one he is currently using is not his own. His success during this trial indicates he is ready for a personal device to carry with him between school, home, and community settings.

## Speech-Language Pathologist Signature

I am not an employee of, nor do I have, a financial relationship with AbleNet Inc., the QuickTalker Freestyle speech device supplier.
