

QuickTalker Freestyle Success Story

Chloe, Mom to Knox

“He’s 7, it’s the first time that he’s ever been able to use a communicative device to speak to another kid, which is huge!”

Meet Chloe, mom to 7-year old Knox. Knox is mostly non-verbal and had been using AAC on and off for a while. He was having a hard time separating the use of devices to watch videos or play games with using a device as a tool for communication. The families SLP recommend AbleNet and the QuickTalker Freestyle to get Knox a dedicated device that would only be used for communication.
