

# QuickTalker Freestyle Spotlight

## Meet, Daisy Mae!

In April of 2023, something magical happened for Daisy Mae - she received her voice! And she's not just using it, she's excelling! Her QuickTalker Freestyle has become her trusted companion, allowing her to confidently communicate her wants and needs with her family. But it doesn't stop there - Daisy Mae is taking her newfound power out into the world, using her voice to participate in social situations in public. Her family is overjoyed with her progress!

When we first got the QuickTalker Freestyle device, my daughter, Daisy Mae, was very excited! When she woke up the next morning to go to school, she grabbed the QuickTalker and wanted to strap it around her shoulder to take with her!

When Daisy Mae heard the QuickTalker Freestyle speaking, she engaged. She came over and began to select her own icons and communicate with me. Several months ago, Daisy Mae started saying two words. Now, she's saying up to five words.

I began to use the QuickTalker Freestyle to help get Daisy Mae potty trained. Since having the QuickTalker Freestyle, she even has asked for the bathroom while we were out at the restaurant!

It's so exciting to see that the QuickTalker Freestyle is helping us with our goals. As a parent, I'm so happy to see the progress and development of speech and language in my baby girl from using the QuickTalker Freestyle."
